Friday, May 17th 12:00 PM to 7:00 PM

IBEW 577

1024 S Lawe St
Appleton, WI 54915

Saturday, May 18th 8:00 AM to 3:00 PM

Carla Gruetzmacher Administrative Manager I.B.E.W 292

"I am simply amazed by this service. I participated in a simple 10-minute ultrasound to find out if I had risk of stroke. In that 10 minute I not only found out I had no risk of stroke, **BUT I was made aware of what turned out to be thyroid cancer.** This service explains what they are seeing with your ultrasound as they are performing the test. So, as the technician was scanning me, he explained that I **had a small thyroid cyst that was very low risk**, but that I should consult my doctor and let him decide next steps. I am so lucky I did! My doctor stated that without this ultrasound there would have been no way to detect such a small cyst, and finding cancerous cysts early is the key. My treatment was easy, and there was no need for any chemo or radiation. Please give an hour of your time even if you do not think you have risk of stroke, it very well may save your life.
