

# THE *GERMIEST*

## THINGS IN YOUR OFFICE

### DESKTOP

Average of 21,000+ germs per square inch

Remove all items from the surface of your desk and wipe thoroughly to clear all dust

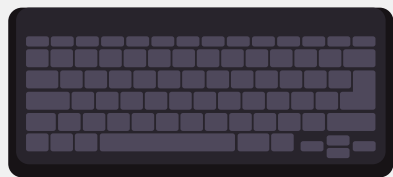

### OFFICE PHONE

Average of 25,000+ germs per square inch

Wipe down your office phone regularly, pay extra attention to the receiver and keyboard

### KEYBOARD

Your keyboard may contain more germs than your toilet seat

Wipe down regularly and turn over to dislodge trapped dirt & debris - don't forget your mouse too!

### DOOR HANDLE

Chief spreader of viruses like COVID-19

Clean both sides of your own office door handles - for large workplaces, develop a plan to have all wiped at least once daily
